## PRODUCT DESCRIPTION

Silicone Remover is a cleaning solvent formulation used to remove silicone from all types of glass, metal, tile, wood or masonry surfaces. It is ideal for final cleaning jobs in the construction industry.

Silicone Remover is the best way to remove old silicone sealant and prepare the site for new silicone.

### **Ideal for:**

- Glass
- Metal
- Tiles
- Wood
- Masonry
- Ceramics
- Porcelain
- Grouts

## DIRECTIONS FOR USE

**Dilution:** No dilution is required.

### Removal of silicone from surfaces

1. Apply by spray or brush.
2. Allow to dwell for approximately 30 seconds.
3. Remove silicone and excess remover with a cloth, using a scrapper where necessary.

### Replacing mouldy silicone

1. Remove any excess silicone with a sharp knife.
2. Lacerate the remaining silicone surface before applying Silicone Remove.  
This will accelerate the process.
3. Apply by spray or brush.
4. Allow to dwell for at least 30 seconds.
5. Remove silicone using a scrapper and cloth.
6. Treat the affected area with our [Algae Died B](#) to kill mould and algae.
7. Allow the area to thoroughly dry.
8. Reapply silicone.
