## PRODUCT DESCRIPTION

Vitroglaze Pre-Cleaner is formulated to prepare glass surfaces for the application of Vitroglaze. It removes contaminants from the glass and leaves no residue.

If the glass is old or obviously soiled, first use a cream cleanser to remove the bulk of the soiling before applying Vitroglaze Pre-Cleaner for the final deep-clean.

# Chemron

## DIRECTIONS FOR USE

Dilution is not required.

1. For old glass or glass with a build-up of limescale or soap scum, clean the glass using a cream cleanser and a scratch-free scourer. Rinse thoroughly with water and dry the entire surface with a good-quality squeegee.
2. For both new glass and old glass for which step 1 has been completed, apply Vitroglaze Pre-Cleaner to the dry glass surface and, using a clean dry cloth, wipe over the surface until all the glass is streak-free and dry.
