## PRODUCT DESCRIPTION

Citrasolve is a highly effective, natural degreasing and cleaning product. This combination of natural solvents is quick-drying, doesn't leave any residue, and has a pleasant natural fragrance.

Electrical equipment can be easily degreased and dewatered using Citrasolve. It has been tested to AS1769 - 1975 and has a dielectric strength of 8KV.

Automotive, hospitality and waste management industries widely use this natural cleaning and degreasing product.

### Product Features:

- Natural cleaning and degreasing product
- Citrasolve may be applied by spray, dip or brush method
- Non-conductive
- Non-corrosive
- Non-residue
- Quick-drying
- Biodegradable
- Dielectric strength of 8KV

### Ideal for:

- Tar and asphalt
- Grease and oil
- Adhesives
- Ink
- Wax

For an aerosol product with similar properties, we recommend our [Citraerosol](#).

### Customer Experience - Perisher Blue Pty Limited

*I am writing this email to endorse one of your products, CITRASOLVE.*

*Here at the Skitube Alpine Railway, Perisher Ski Resort, we use CITRASOLVE as an instant degreaser. It is extremely effective at removing our rack and flange grease, an open gear lubricant with very high viscosity. This lubricant is almost impossible to remove from parts, components and clothing but CITRASOLVE takes it straight off.*

# Chemron

*We look forward to continuing to use CITRASOLVE for all of our hardest to clean jobs.*

## DIRECTIONS FOR USE

### General cleaning including sticky or waxy residues

1. Apply using a microfibre cloth, sprayer or brush.
2. Agitate with the cloth or brush if necessary.
3. Allow to dwell for up to 5 minutes, but do not allow to dry.
4. Rinse the area with water or a wet cloth.

### Quick break degreaser

1. Spray or brush onto the surface.
2. Allow to dwell for 5 to 10 minutes. Agitate if necessary.
3. Rinse off with hot or cold water.

### Electrical equipment and machinery

1. Isolate all electrical equipment and machinery before applying.
2. Apply using a brush or sprayer.
3. Allow to air dry and then wipe with a lint-free cloth or brush it clean.
4. Ensure equipment is dry before re-establishing the electrical connection.

**Note:** Recommend trialling the product in an inconspicuous area to test suitability for the surface.
