PRODUCT DESCRIPTION

Wetting Agent is a non-ionic surfactant with an ethylene oxide condensate of nonylphenol. It is a non-toxic non-biodegradable soil conditioning solution with a lasting residual effect.

Wetting Agent is a complex blend of synthetic surfactants, designed to increase the beneficial effects of water. Being non-biodegradable, it is a dependable treatment with lasting effects. Wetting Agent will provide several months residual benefit.

Wetting Agent allows water to penetrate deeper, thus retaining moisture closer to the root system. It can be mixed with herbicides, fungicides or fertilisers to increase their beneficial effects.

Wetting Agent is ideal for reducing water consumption and breaking the surface tension of soils. It can be used as part of any solution to enhance wetting, spreading and absorption.

Product Features:

- Non-toxic
- Soil conditioning solution
- Dependable application rate
- Provides several months residual benefit

Ideal for:

- Bowling and golf clubs
- Racing circuits
- Parks and gardens
- Large factory complexes with gardens
- Enhancing weed control activities
