PRODUCT DESCRIPTION

Spa Bath Treatment has been developed for the cleaning and sanitising of refillable spa baths commonly found in hotels, motels, resorts, gymnasiums, clubs and homes.

Spa baths not attached to a filtering or chlorinating system, such as home spas are frequently a source of contamination and infection. The warm water is an ideal medium in which a wide variety of pathogens can multiply and flourish.

Contaminated water residues remaining in the pumping mechanism and are pumped back into the bath the next time it is used. This unhygienic event is countered by sanitising the system with Spa Bath Treatment.

Product Features:

- Cleaning and sanitising of refillable spa baths
- Non-corrosive
- Non-toxic
- Non-irritating
- Kills Staphylococcus aureus and E. coli

Chemron

DIRECTIONS FOR USE

Dilution:

1 Litre to every 75 Litre of spa bath capacity. 1.5 litres are normally adequate for a standard-sized spa.

1. Fill spa to just above the jets.
We recommend that you do not fill to operating capacity.
2. Add the required amount of product.
3. Run the spa for 3 to 5 minutes.
4. Empty the bath and clean in the normal manner.

Frequency of treatment:

For domestic application:

This sanitising procedure can be performed after the bath has been used and before emptying it thereby avoiding the need to refill the bath specifically for this procedure. As a minimum, the procedure should be carried out monthly where the bath has been used.

For commercial or hospitality situations:

Each time the bath is used by a guest and before the next guest's occupation.

Please use the complementary indicator stickers to establish if the bath has been used.
