PRODUCT DESCRIPTION

Stainless Steel Cleaner is a heavy-duty cleaner formulated to remove tea staining and corrosion common to stainless steel surfaces exposed to the elements.

We strongly recommend that after the cleaning process the surface is protected with a suitable sealer such as our

Stainless Steel Sentry. This will protect the newly cleaned surface from further degradation and will prolong the brighter, polished finish.

Chemron

FEATURES

- Brings older surfaces back to a near-new state.
- Removes tea staining and rust spot
- Removes corrosion
- Brightens finish

APPLICATION

Ideal Use For:

- Balustrading
- Any stainless steel surfaces
- Tanks
- Cookware
- Ovens
- BBQs
- Appliances

DIRECTIONS FOR USE

Dilutions:

- Light cleaning – 1 part to 15 parts of water.
- Medium cleaning – 1 part to 10 parts of water.
- Heavy cleaning – 1 part to 5 parts of water

Directions:

1. Clean off any loose matter.
2. Apply using a brush or sprayer.
3. Agitate with a brush or non-scratch scourer working from the bottom up.
4. Allow to dwell for 5 to 10 minutes, but do not allow to dry.
5. Thoroughly rinse the area with water.
6. Repeat steps 2 to 5 if required.
7. Apply a suitable protectant.

TESTIMONIALS

Bell Stainless

Stainless Steel Cleaner has been formulated to effectively clean stainless using a combination of phosphoric acid and ammonium bifluoride, providing thorough and deep cleansing of not only grime, mineral salts, leaching, oxidation and other stains, but most importantly Tea Staining. Once the cleaner is neutralised the next step is to apply Stainless Steel Sentry – a protective coating that keeps stainless steel looking great for months, even in harsh coastal environments. It also helps to prevent future soiling by the creation of a water-repellant film which reduces the corrosive buildup of salts, etc.

As a company, we've found Chemron's products and processes to be time effective, manageable and safe to use, while providing longevity to the appearance and structure of stainless steel.

We have no hesitation in recommending Chemron products and are pleased to be associated with another company who takes their work as seriously as we do.

David Vine

General Manager
Bell Stainless

D&R Stainless

For some years now, we have enjoyed the benefits of your Stainless Steel Cleaner to remove weld burn marks when we are fabricating in Stainless Steel. If you are not aware, this is a real problem.

We are very happy with the results we get when we use your product. It is very easy to use and has little to no fumes compared to other products on the market which are nasty to use and very fummy. In addition, the fact that we can dilute the product confirms that it is a true concentrate and provides us not only with a product that gets the results we want it doesn't cost an arm and a leg.

I appreciate your service to our company.
