

## Insakill Water Based

### Industrial Strength Insecticide

Insakill Water Based with pyrethrins and piperonyl butoxide has specially selected surfactants that allow for rapid and deep penetration of insect exoskeleton. It has a pleasant odour and is ideal for indoor applications.

Insakill comes in two formulas (solvent-based and water-based) which together contain four separate insecticides. Alternating treatment between the two formulations can inhibit the development of insect immunity and allows for complete eradication of all unwanted insect pests.

Our Insakill Solvent Based is a non-residual, concentrated insecticide that contains well-proven ingredients tetramethrin and bioresmethrin in industrial volumes.

#### Applications:

- Spiders and Cockroaches
- Silverfish
- Fleas and Ants
- Weevils
- Moths, Flies and Mosquitoes

#### Directions for Use:

**Dilution:** Dilution is not required.

#### Coverage:

- Flying insects: 0.1 ml per cubic metre.
- Crawling insects: 25 ml per square metre.

#### Directions:

1. Treat infected area

*Flying insects: Spray several short bursts into the air in the direction of the insects.*

*Crawling insects: Spray direct onto insects when seen and into cracks and crevices where they lurk.*

*Fogger:* This product can be used with foggers

2. Wash and rinse the spray applicator thoroughly.
3. Repeat treatment if insects are still present.

#### Related Pest Control Products:

- For ongoing protection against further pest infestation consider using Insectaguard Solvent-Based or Insectaguard Water-Based.
- For a persistent flying insect problem like flies and mosquitos consider using Sentinel with an Automatic Dispensing Unit.
- For wasp nests, particularly around electricity, consider using Wasp Eliminator.
- For birds - see our products - Bird Ban and Bird droppings remover.

#### Features:

- Kills crawling and flying insects on contact
- Low-irritant formulation
- Non-toxic
- Non-aerosol
- APVMA Approved

#### Pack sizes:

1L • 5L • 15L
