# Medipure Hands for Spray Dispensers

## Hand Sanitiser Refill

Medipure Hands for Spray Dispensers is a high alcohol hand sanitiser that kills germs and bacteria. It evaporates readily leaving no tackiness or odour. This hand sanitiser uses natural emollients. As a result, your hands are moisturised and safeguarded against dryness and irritation.

Medipure Hands for Spray Dispensers is suitable for repeated use in work environments such as offices, schools, childcare centres, retail outlets, sports facilities, hotels, restaurants, pubs and clubs.

Whether you are just looking for five litres or a bulk supply, Medipure Hands for Spray Dispensers is an excellent choice. It uses the formula detailed by the World Health Organisation and the Australian Therapeutic Goods Administration.

Pearla Hand Soap is an effective companion product to Medipure Hands, as it will re-moisturise hands after the use of high-alcohol hand sanitisers.

## Applications:

- Offices
- Schools
- Childcare centres
- Retail outlets
- Sports facilities
- Hotels, Restaurants, Pubs and Clubs

**Highly effective formula** - Isopropyl Alcohol (IPA) is the core hand sanitising ingredient with a natural glycerine providing the necessary moisturising effect. Importantly, it is colour and fragrance-free.

**Pleasant to use -** Medipure Hands for Spray Dispensers is light on the hands, evaporates readily, and does not leave a tacky residue like some heavy gel sanitisers.

**Best for dispensers -** This bulk liquid sanitiser is ideal for all types of hand sanitising spray dispensers and represents excellent value for money. It's light IPA formula keeps nozzles clear and clog-free ensuring a fine spray every time.

**Excellent value -** One litre of Medipure Hands for Spray Dispensers will provide over 2000 hand sanitiser applications. Medipure Hands for Spray Dispensers is a convenient way of buying bulk hand sanitiser for refilling dispensers.

## Directions for Use:

1. Apply sufficient liquid to hands to enable a thin coverage.
2. Rub into hands until liquid is absorbed.
3. Allow about 10 seconds to dry and then resume normal duties.
