Directions: Algae Died B

Read the product SDS carefully before handling this product.

Dosing and methods may vary with the site conditions. Please call us on 1800 812 309 to discuss your situation in more detail.

Situation	Control	Rate of Application	General Instructions
Spa Therapeutic pools	Algae Bacteria Black spot	*Initial treatment:* 200ml per 10,000L of water *Preventative Maintenance:* (weekly to monthly) 200ml per 10,000L of water.	Use in conjunction with regular chlorine treatment. Treatment may reduce chlorine usage, corrosive and irritating effects. For spa baths, use in conjunction with a cleaning product such as Chemron Spa Bath Treatment. *Calculate the volume of a pool by multiplying the length x width x depth of the pool in metres x 1000 to give the volume in litres.*
Swimming pools		*Summer Dosage:* Initial Treatment: 250ml per 10,000L of water. Weekly to monthly: 170ml per 10,000L of water. Initial treatment or heavy algae control: 600ml per 10,000L of water. *Monthly winter Dosage:* One dose of 600ml per 10,000L of water.	
Air conditioning Water	Algae Bacteria Slime	Initial Treatment: 1L per 10,000L of water. Maintenance: 200ml per 10,000L of water.	Dose to the tank. Clear dead algae if present. Complete hygienic treatment is achieved when Algae- Died B is used in conjunction with a sodium hypochlorite solution.
Bowling greens, Golf greens Bunkers General turf areas	Algae Moss Slime	Initial Dose: 1L of Algae-Died B to 100L of water.	Apply the mixture evenly over the entire green and allow to dry
Sea pools Boat ramps Pathways		1L – 2L of Algae-Died B to 100L of water.	Use after pre-cleaning treatment such as Chemron Farm Mate or Power Kleen (change to degreaser and cleaner) Clean surface with high-pressure water. Allow work area to drain, preferably to dry. Apply Algae Died B to the surface using a sprayer or airless foaming gun: Allow to dry. In tidal conditions allow 30+ minutes dwell time before tidal surge
General		30ml of Algae Died B per 5L water	Do not rinse treated surfaces
Walls, floors, masonry, fibro, coated surfaces etc.		1L – 2L of Algae-Died B to 100L of water.	Clean surface with high-pressure water. Allow work area to drain, preferably to dry. Apply Algae Died B to cleaned surface using a sprayer or airless foaming gun. Allow to dry, do not rinse
Piggeries | hatcheries, Dairies | kennels	Bacteria Algae Moss	1Ltr of Algae-Died B with 100Ltrs of water	May be sprayed as a sanitiser over surfaces when livestock is removed. Apply by sprayer.
