45+ Years of Chemical Innovation, 100% Australian Owned

Chemron Australia Pty Ltd is a 100% Australian-owned developer, manufacturer and supplier of industrial chemical products. With over 45 years of experience in the chemical industry, we deliver heavy duty cleaning, pest control, surface coatings, and a wide range of specialty industrial products to businesses across Australia.

Based in Port Kembla, NSW, our in-house laboratory, manufacturing facility and technical team allow us to develop innovative chemical solutions to complex industrial problems — from difficult cleaning and sanitising challenges to advanced surface treatment applications.

Built on Expertise

Our team of PhD-qualified chemists and experienced technical consultants bring deep knowledge to every formulation. Whether solving a cleaning challenge or developing a custom product, we combine scientific rigour with practical industry know-how.

Nationwide Reach, Local Service

With delivery Australia-wide and a consultancy-first approach, we serve clients from single-site operations to national enterprises. When you need the right chemical solution, we deliver it — and we back it with technical support.

MANUFACTURING & PACKAGING

The Industrial Chemical Partner Australian Businesses Trust

Chemron combines over four decades of chemical expertise with Australian manufacturing capability. We don't just supply products — we develop solutions tailored to your specific industrial challenges. From initial consultation through to ongoing technical support, we're committed to helping your business operate more efficiently, safely and sustainably.

In-House Development & Manufacturing

We formulate and manufacture our products in Australia, giving us full control over quality, consistency and lead times. No middlemen, no imported unknowns.

PhD-Level Technical Consultancy

Our chemists work directly with clients to identify the right product or develop bespoke formulations. Expert advice is part of every engagement.

Comprehensive Laboratory Services

Our analytical laboratory provides high-precision testing using IC, HPLC, AAS, and XRF instrumentation — supporting quality control, troubleshooting and compliance.

Contract Manufacturing & Custom Formulation

If our current range doesn't fit, we'll adjust formulations or develop an entirely new product to your specifications, manufactured and packaged to your requirements.

BARISSIMA

No Blockages. No Disruptions. Just Results.

"We are the exclusive importer of Barissima Milk Systems from Europe into Australia and New Zealand.

Daily cleaning is vital to maintaining the performance and hygiene of our Barissima Milk Systems. Previous chemical trials led to machine blockages and operational challenges.

Chemron worked closely with us to develop a customised, private-label formulation specifically suited to our machines and operational requirements. Their ability to tailor both the product and supply process ensured we received a solution that aligned perfectly with our brand and performance standards.

Chemron's expertly formulated solution eliminated these issues entirely, restoring efficiency and reliability. Working together ensures that our cleaning solutions are distributed smoothly to distributors across Australia.

Their expertise, responsiveness, and commitment to quality make them a highly recommended partner."

Markus Rüfenacht, Barissima Milk Systems

Complete Chemical Solutions From Formulation to Delivery

Chemron provides end-to-end chemical services — from product development and analytical testing through to manufacturing, packaging and Australia-wide delivery. Our integrated approach means clients get consistent quality, technical depth and responsive service under one roof.

Whether you need an off-the-shelf industrial product, a tailored formulation, or advanced laboratory analysis, we have the expertise, equipment and capacity to deliver.

CHEMICAL MANUFACTURING & SUPPLY

We develop, manufacture and supply a comprehensive range of industrial chemical products including degreasers, cleaners, sanitisers, surface coatings, pest control products and electrical solutions. Concentrated formulations deliver cost-effective performance, with delivery available Australia-wide.

LABORATORY & ANALYTICAL TESTING

Our laboratory delivers high-precision analytical services using Ion Chromatography, HPLC, Atomic Absorption Spectroscopy, and X-Ray Fluorescence. We support routine monitoring, contamination analysis, quality control, and process optimisation across a wide range of industries.

CONTRACT MANUFACTURING & CUSTOM FORMULATION

We manufacture products to your specifications — whether adjusting an existing formulation or developing something entirely new. Full packaging, labelling and compliance support included. Ideal for businesses wanting Australian-made products under their own brand.

TECHNICAL CONSULTANCY & PRODUCT ADVICE

Our consultants are trained in solving complex industrial problems. From recommending the right product for your application to providing chemical development, packaging design and compliance guidance, we're your technical partner.

Trusted Chemical Solutions Across Australia's Most Demanding Sectors

Chemron provides chemical products and services across more than 20 industries. Our experience spans heavy industry through to healthcare, food processing and aged care. We understand the compliance requirements, operational demands and quality expectations in each sector — and we deliver accordingly.

Manufacturing & Industrial

Heavy duty cleaning, degreasing, surface treatment and maintenance chemicals for manufacturing operations, factories and industrial facilities. Our products are formulated for the toughest environments.

Agriculture & Horticulture

APVMA-registered pest control products alongside cleaning, sanitising and specialty chemicals for agricultural and horticultural applications. Reliable performance in the field.

Construction & Building

Surface coatings, concrete sealers, anti-slip treatments, fire protection products and cleaning solutions for the construction and building sector. Compliant, durable and Australian-made.

Healthcare, Hospitality & Aged Care

Sanitising, hygiene and cleaning products designed for environments where safety and compliance are non-negotiable. Trusted by hospitals, aged care facilities, hotels and food service operations.

Scientific rigour, consistent quality, responsible manufacturing

Chemron is committed to producing safe, effective and compliant chemical products. Our in-house laboratory, qualified chemists and controlled manufacturing processes ensure every product meets specification. We follow safe work practices across formulation, manufacturing and delivery — and we hold relevant registrations including APVMA product registration where required.

Quality, Compliance & Safety You Can Rely On

"We rely on Chemron for high-quality, compliant and safety-focused chemical solutions — consistently reliable products from a company that's professional and easy to work with."

Cessnock City Council

Our Capabilities

With PhD-level chemists, advanced analytical instrumentation and a fully equipped manufacturing facility, Chemron delivers chemical solutions backed by science and supported by decades of practical industry experience.

- ✓ PhD-qualified chemists and experienced technical consultants
- ✓ Advanced analytical lab: IC, HPLC, AAS, XRF and salt spray testing
- ✓ In-house formulation, manufacturing and packaging
- ✓ APVMA-registered pest control and agricultural products
- ✓ Full SDS documentation and compliance support
- ✓ Contract manufacturing with custom formulation capability
- ✓ Delivery Australia-wide with bulk and large quantity options

Protecting Sydney's Iconic Ocean Pools with an Environmentally Responsible Algaecide Solution

The Challenge

Sydney's Northern Beaches, stretching from Palm Beach to Manly, are home to some of Australia's most heavily visited and iconic ocean swimming pools. These ocean-fed pools require ongoing maintenance to prevent the build-up of moss, algae and marine contaminants that can create hazardous, slippery surfaces and compromise water quality.

Because these facilities operate in a natural ocean-water environment, traditional treatments such as chlorine are not a viable option. The councils required an effective solution that could directly control algae growth while preserving the surrounding marine ecosystem and ensuring public safety year-round.

The Result

With the adoption of Algae Died B, Sydney's Northern Beaches councils have been able to maintain their ocean pools at an excellent standard while reducing slip hazards and supporting water quality outcomes. The solution provides a reliable and repeatable maintenance approach that protects both public safety and the marine environment. The success achieved across the Northern Beaches has led to broader adoption, with many coastal councils throughout Australia implementing the same solution to manage their ocean pool and marine-adjacent infrastructure.

Our Solution

To address this challenge, the councils implemented Algae Died B as a targeted algaecide treatment across their ocean swimming pools. The solution enables operators to effectively limit algae growth without harming the broader marine environment, allowing pools to be maintained to a consistently high standard throughout the year.

In addition to pool maintenance, the product has also been used to clean boat ramps, removing slippery moss and algae to restore surface traction and improve safety for vehicles launching and retrieving boats. The environmentally responsible formulation and value-for-money performance have made it a practical and sustainable solution for coastal infrastructure.

*Industrial chemical solutions developed, manufactured
and delivered across Australia.*
